

TECHNICAL INFO PANEL GLIDE BLINDS

Description

- Cost effective
- Stylish modern look
- Low maintenance
- Easy wand operation
- Anodised top and bottom rail

FABRIC TYPES

Blockout

Blockout fabrics offer the ultimate level of privacy, day and night while helping to insulate the room. Blockout fabrics offer room darkening capabilities. They are ideal for bedrooms and home theatre/ TV rooms.

Light Filtering

Light Filtering fabrics screen out harsh light, but do not allow a view through. They bring texture or patterns to light coming into a room whilst providing daytime and night time privacy.

Sunscreen

Sunscreen fabrics allow for heat and light control while maintaining your view. Perfect for reducing glare and heat in a room exposed to the sun.

Minimum & Maximum Sizes Available

Our Panel Glide Blinds come in six (6) standard width measurements. We recommend that when measuring your window, you make a decision based on the space around your window as to how much of the panel stack can clear your window to maximise the amount of light entering your room. In most cases it will be suitable to select one or two sizes larger than your window width. Please ensure that there is suitable space within your room to install the running track as we will be unable to accept a return for this reason.

Widths for 600mm wide panels

1650mm – 3 Panels
2200mm – 4 Panels
2750mm – 5 Panels
3300mm – 6 Panels

Widths for 800mm wide panels

3800 – 5 Panels
4550 – 6 Panels

Drop

Maximum 3000mm

Fitting

We do not recommend installing Panel Glide Blinds into the recess of a window. Because of the size of the panels, it is required that they stack to one side when open. Because of this reason we always recommend face fit installation and that you measure for the track to finish past the edge of the window to allow the panels to clear the glass when open. Panel sizes are 600mm or 800mm so please take these measurements into account when selecting from the standardised width measurements.

TECHNICAL INFO ROLLER BLINDS

Cleaning

- Do not use cleaning products to clean your blinds as they may damage the fabric or compromise the colour.
- General dusting is suitable and should be done regularly to maintain your blinds.
- For spot cleaning, remove as much dust as possible before wiping with a damp cloth.
- Refer to individual fabric properties for additional cleaning instructions.
