

## TECHNICAL INFO VENETIAN BLINDS | ALUMINIUM

### Description

- Cost effective
- Stylish modern look
- Low maintenance
- Provide flexible light control
- Offer privacy in your home

### MATERIALS

#### 25mm Aluminium

\*If you require 50mm Aluminium please call us as we can cater for this as a custom order.

#### Minimum & Maximum Sizes Available

Width: 270mm – 2700mm

Drop: 300mm – 3000mm

#### Mounting

The depth required for a recess fit is 30mm for the blind to sit neatly inside the window frame.

For a face fit installation the projection of the head rail is 25mm.

#### Cleaning

- Do not use cleaning products to clean your blinds as they may damage the blind or compromise the colour.
- General dusting is suitable and should be done regularly to maintain your blinds.
- For spot cleaning, remove as much dust as possible before wiping with a damp cloth.
- Refer to individual fabric properties for additional cleaning instructions.

### FEATURES

#### Tilt wand

The tilt wand is a clear plastic wand that operates the tilting mechanism of the blind to open and close the slats.

#### Cord mechanism

By pulling the cord mechanism you can raise the blinds to your desire height. This then locks into place by changing the angle of the cord away from the floor.

**NOTE:** This product is recommended for domestic use only and is not recommended for commercial applications.

All products supplied by DIYonlineblinds.com.au include all installation components and detailed instructions to ensure the perfect fit.

## TECHNICAL INFO VENETIAN BLINDS | ALUMINIUM

### WARNING CHILD SAFETY WITH LOOPED CORDS, CHAINS & BEAD CORDS

Young children can strangle in the loop of pull cords, chain and bead cords, and cords that run through window coverings. They can also wrap cords around their necks. To avoid strangulation, keep cords out of the reach of young children. Also,

1. Install safety devices that remove the cord loop or reduce access to cords, and
2. Move cots and furniture away from window covering cords.

The tension device reduces the hazards of strangulation or entanglement by limited access to the cord or bead chain. Anchor the device with the cord or bead chain to the wall or floor so young children cannot pull the cord or bead chain around their necks. Always keep cords out of the reach of young children.

**WARNING REGARDING CLEATS:** Cleats should be mounted at a sufficient height, so as to keep cords out of reach of young children. Cords must be fully wrapped around the cleat at all times. Always keep out of the reach of young children.

**WARNING FOR CORD RELEASE DEVICE:** This cord release device reduces the strangulation hazard in the pull cord by removing the permanent loop. The cords should not be tied together and the cords should not be twisted around each other when the device is assembled. This device will not prevent strangulation if young children wrap pull cords around their necks. Always keep cords out of reach of young children.
