

Measuring For Vertical Blinds

Vertical Blinds

Vertical Blinds are commonly used to cover sliding doors and large windows. They provide complete privacy when closed but can be easily rotated to allow some light in or a complete view outside. Available in a wide range of materials, colours and fabrics, vertical blinds are a great practical and stylish window furnishing option.

Recess Vertical Blind

Vertical blind face fitted will cover an area larger than the window itself and the brackets are fitted to the window/architrave frame.

A Measure the exact width of the architrave and then add 60-100mm on both sides. The additional width you add is entirely optional. This is intended to increase the privacy and light control.

B Measure the drop from the top from the top of the architrave to where you want the blind to finish. We recommend 10mm off the floor or 50-100mm below the frame. Make sure that you don't have any obstructions.

Recess Vertical Blind

Depth Required: You will need a depth of 135mm for the blind to fit neatly inside the recess for 127mm slats and 97mm depth for 89mm slats. If you don't have enough depth we recommend using a Face Fit.

A Measure the exact width within the window frame at the top, middle and bottom. Record the *smallest* measurement to ensure the blind fits within the recess.

B Measure the drop from the top of the inside recess to the base of the inside sill at the left, middle and right hand side. Record the *smallest* measurement to ensure the blind fits within the recess.

Important: Do not make any deductions on a recess fit, as our factory will do this to ensure a perfect fit.

Measuring For Vertical Blinds

Essential Measuring Tips

1. Always use a metal tape measure
2. Always write down your measurements indicating which is width and drop. Take extra care to ensure you don't reverse them.
3. Double check all your measurements. We don't refund or replace items due to inaccurate measurements.
4. There is no need to shorten your measurement to allow for clearance. We'll take that into account. All we need from you is the exact measurement.
5. We require all measurements in millimeters.
6. Measure every window, as they may have slight variations that will effect your window furnishing from fitting perfectly.
7. If you have any questions don't hesitate calling us on **1300 918 390** between **9am and 9pm Mon to Fri** or **10am to 5pm Sat & Sun**. Our customer service team is more than happy to help.
